

Investment in Growth-Oriented Consumer, Media and Healthcare Businesses

3 Oceans Group is a private investment firm that invests in and acquires attractive businesses in targeted industries. We seek attractive exit options for business owners, ownership opportunities for management, and investment options for our partners. We achieve this by providing liquidity and growth capital to a range of middle market businesses. 3 Oceans plays an active role in the sourcing, structuring, research, execution and monitoring of our investments.

We provide value-added growth capital to businesses seeking to expand—through new products or services, new market entry, launch of additional units, acquisition of accretive assets, or a host of other initiatives. We also provide attractive exit scenarios for business owners, as well as transaction opportunities for corporate buyers and sellers. In all instances our goal is to provide our partners with investment opportunities that carry high returns potential while mitigating risk.
